

2013-14 SA NATIONAL LAND-COVER MAP PROJECTION NOTES.

Please note that the original projection used for all Landcover processing is UTM Zone 35 North, WGS84.

All other projections have been derived from this original projection format.

The Geographic re-projection has been generated by specifying a non-square pixel output format, whilst the UTM zone 35 South projection format has been generated using a 30 x 30 meter pixel output format.

(see Section 4 "Product Description" of the Data User Report for more information)
